

Assignment #6

- Make your Assignment #5 as a CGI program
- If not, you can try a new one
- Your program should:
 - From a web page, take in at least 1 input to control (or change) an LED's mode:
 - Turn off and turn on
 - or change a state: like a color; blink mode; etc
- Extra points to show the LED status on the web page
- Make a video of your project and post on YouTube
